Wager Selection Options

Here I should be able to declare a bet.

This must allow me to specify if the bet is  
ATS or Total.

I need to be able to input the line, the wager  
payout, and the number of units on the bet

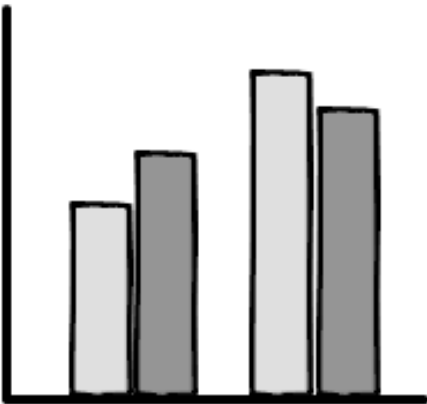

After officially declaring a bet. The NBA  
page will show a bet is made for all to see.

All:  
+\$890  
ATS:  
+\$100  
Total  
+\$790

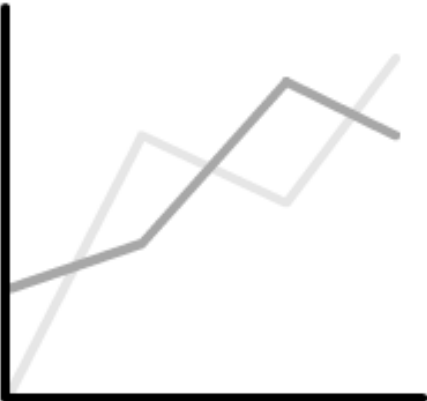

Need bets placed and results of those wagers

ATS Line Movement Value:  
+ 20.5 points, + 2.5% ROI  
Total Line Movement Value:  
+ 60 points, +3% ROI

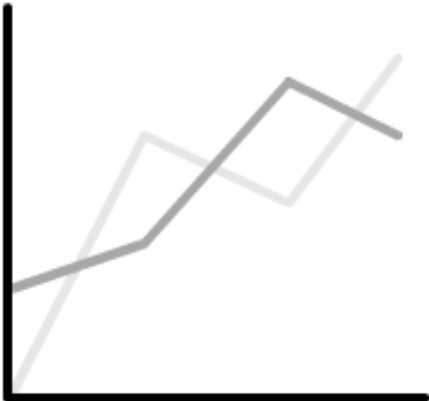

Need to track where a bet was placed and the closing line on that bet.
